PRESS RELEASE

FOR IMMEDIATE RELEASE:

PPM 2000 INTEGRATES DISPATCHLOG® WITH PERSPECTIVE™. Facilitating the escalation from activity to incident.

Edmonton, Alberta, Canada—May 13, 2008—PPM 2000, the leading developer of Incident Reporting and Investigation Management software for security, safety and risk management, announced today the release of Perspective DispatchLog and, with it, the ability for Perspective clients to integrate their Dispatching and Incident Management solutions.

With DispatchLog, organizations manage all incoming activities and requests for service—from initiation, to deployment, to response. With Perspective, incidents are documented for further investigation, analysis and reporting. By integrating the two systems, users can eliminate unnecessary data entry and hasten the follow-up process by escalating significant activities into incidents. All of the common fields carry over, and a validation process in Perspective ensures that each report is reviewed before being accepted as an official incident.

Lenora Thomas, PPM 2000's Customer Service Manager, remarked, "A significant number of our clients use DispatchLog to manage activities and dispatch officers. To them, its past integration with IRIMS was invaluable, and it is exciting to now offer the same level of connectivity for Perspective."

About Perspective by PPM 2000:

Track. Analyze. Report... PREVENT. With Perspective by PPM 2000, organizations benefit from a single enterprise platform to capture and report data relative to incidents and investigations. Users can intelligently action and query their data for trending, risk mitigation and planning activities. Then, with the ability to accurately assess what is happening and its potential impact, they can make informed decisions that optimize performance and illustrate the effectiveness of their security operation.

About Perspective DispatchLog:

With Perspective DispatchLog, organizations can automate the dispatching process, and document a request for service all the way from initiation, to deployment, to response. With an easy-to-use interface, Perspective DispatchLog captures all of the relevant information on one screen, and its convenient drag and drop functionality expedites the dispatching

process. With sixty pre-formatted reports and extensive searching options, users can easily analyze dispatch requests, officer activity and response times. Then, with the integration between Perspective and DispatchLog, the click of a button turns a routine activity into an incident for further follow-up and investigation.

About PPM 2000 Inc.:

PPM 2000 Inc. was established in 1988 to develop Incident Reporting and Investigation Management software for the corporate security industry. The company's enterprise-level solutions help organizations accomplish their security, risk management and compliance objectives through data-driven decision making and knowledge management. Thousands of organizations have implemented a PPM solution, and the company's clients span all industries and include many of the Fortune 1000. PPM 2000 is a Microsoft Gold Certified Partner.
